How I Caught the Global Health Bug:
Networking & Lecture

Ray Suarez, Senior Correspondent for PBS NewsHour

What are the most pressing and underreported global health issues of our time? What global health successes are transforming the way people live today? As we look forward, what are the emerging global health threats? What are the prospects for vaccines for today's most deadly diseases, such as HIV/AIDS, Malaria, and Tuberculosis? And, why does global health matter as it relates to global development, security, economic growth, and the environment?
