

How to Livestream

Equipment Needed

- Livestream.com account
- Video camera (set on SD or DV not HD) and charged battery or power adapter
- Microphone and extra batteries
- Laptop with fast Internet connection
- Headphones
- Tripod w/ mount
- Firewire cable to connect camera to laptop
- Any needed extension cables or Ethernet cables

How to Record with Sony HD 1000U

1. Put tripod mount on camera
2. Connect camera to tripod
3. Connect your microphone to the microphone jack
4. Turn camera on (Tape mode, not memory mode)
5. Turn microphone on if necessary
6. On the touch screen push Menu > Menu > Standard Set > Rec Format > DV > OK
7. Test your audio by plugging in headphones to audio jack
8. Connect camera to computer with firewire cable
9. Sign in to www.livestream.com
10. Click "Broadcast Now"
11. If you get a message asking for permission to access your camera, click "Allow"
12. Your video should show up in the preview screen.
13. If you want to keep your video after it is recorded, make sure the "Record" slider is set to "On"
14. If everything looks good click "Go Live"
15. After clicking "Stop" you will have the option to "Delete Recording" or "Save Recording" (if "Record" slider was on). Once you delete your recording you cannot get it back.
16. Congratulations! You have completed your first Livestream. If you saved your recording it will be available for viewing on your Livestream channel.
